GREEN BAY, August 8th, 259. He who would see Wisconsin arrayed in all to take a view through the State. Railreads proverbially seek the lowest levels and the poorest lands; yet even along the immediate lines of our railroads the country is rich in agricultural promise. Leaving Milwaukee by the afternoon train on the La Crosse Railroad, on Thursday last, with a bright suuland, which skirts the road for the first forty Flouring Mill of Messes. Wilcox and Waodd miles. The soil here is strong, the farms crea; a substantial stone building, quite new, wheat is unpresedented, and the quality su- was new wheat in the hopper, when we visperior. Crossing the Rock at Horicon, the timber

disappears and we have openings and prairie on either hand. At this station Judgo Lau-RABEE joined our party which was bound on a Trouting Expedition to the streams flowing into Green Bay. As we turned North from the line of the La Crosse road, taking the Chicago, St. Paul and Fond du Lac R. R., we seemed to traverse one continuous wheatfield; most of the grain being already out and stacked, and hundreds of busy hands being ground swells gently on both sides; the farmhouses look neat, the improvements substantial, and the bright expanse of Lake Horthe way from Door to Walworth County, agreeably fills up the picture. The landscape is a smiling one, and in the bright glow of a Summer sun was lovely to look upon. Six o'clock brought us to the Fond du Lac station, nestling in the green woods, at a short distance from the principal business thoroughfare of the city.

CRINKLE," socidentally over-looked in his recent Northern tramp. A drive of three miles in the cool of the evening, over a smooth gravel road, and through a succession of fine farms, brought us to the residence of the late John B. Mack, now occupied by his son-inlaw, Mr. Thomas. There are, no doubt, many pleasant farmers' homes in Wisconsin, which can boast of equal, if not superior, natural capabilities; but I know of none, which liberal expenditure, guided by refined farm embraces eleven hundred and fifty acres, with hill-side and meadow, wood and water, prairie and openings, pasture and tilled land, happily interpreted to snow themselves in Paragnay; while the Government of the Confideration in regard to all persons in the service of Paragnay. Both farms, brought us to the residence of the late shall presently learn. The exciting question of war was as a prominent as prominent as the reader which originated with the Awing of the press, to the effect that the Suspension Bridge is gradually giving way, asserting as with hill-side and meadow, wood and water, prairie and openings, pasture and tilled land, happily interpreted the look and language of the trust of the town. And see it proved as the reader shall presently learn. In the court yard are winding walks and drives, with shrubbery and flower-beds between. The house is of ample size and convenient arrangement for the exercise of that abundant hospitality for which, under both its former and present occupants, it has been so honorably noted.

We passed Friday night in these pleasant courters, and taking an early start Saturday morning, reached Fond du Lac in good season for the morning boat to Green Bay. The passing glimps: I had of Foud du Lac impressed me very favorably. It is prettily sitnated, well laid out, and wears a promising not through any fear of its falling. look of thrift and business activity. I hope to see more of it on our homeward route.-The Appleton Belle, which bore us across Take Winnebago, is a small stern-wheel steam er, with comfortable accommodations for 25 or 100 passengers, and speed enough to make (60 or 70 miles,) in five or six hours, wer there no obstacles to the navigation. But the seventeen locks of the Fox and Wisconsin Rivers Improvement, nearly double this time. As some compensation, however, they give the traveler an opportunity to go ashore at different points on the route and pass a few moments in examining various objects of in-

Our first landing was at Osugosu, a bright and busy looking town, which shows finely from the lake, and having recently been tried by fire, and stood the test bravely. We improved the ten minutes allowed us here to walk up the Main street, the scene of the late conflagration, and note, with gravified surprise, how much the energy and enterprise of the Oshkosh people have already done to remove every trace of the disaster and erect larger and better buildings in place of those which the fire levelled to the ground. The authors of the extensive mischief are in the Oshkosh jail, under vigilant guard, awaiting the judgment of the law. It is to be hoped that they will get their full deserts.

The sail from Oshkosh over the smooth waters of the Lake, to its outlet, at Neenah and Menasha, was a quiet one. We met one steamer, coming up from Appleton, to connect with the morning train from Oshkosh to Milwankee, and the boats up Wolf River; and two small sail craft, loaded with brick, I believe, from Clifton, in Calumet County, to be used in re-building Oshkosh. The brick, in color and quality, resembles and is said to equal, the famous product of our Milwankee kilns. If this be true, brick making at Clifton and in that vicinity, ought to prove a prosperous venture, for nowhere to prove a prosperous venture, for nowhere \$219,230.

It says that the statement is not only false but absurd, and asserts, upon the authority of those who cross the Bridge daily that the sag is less now than it was when it was first used. The slack of the rods and bolts has been gradually taken up, and by the closest inspection of every part, the engineers in charge have been enabled to perfect the little details of the work from day to day until the bridge now stands as the proudest monument of mechanical genius on the continent. All who know anything of the bridge regard it, at this time, as better than ever, and the stockholders among the rest. The railroad conductors say that the story of the passengers leaving the trains through fear is new to them. Passengers have often walked

SINGULAR MALADY. -- A young man named SINGULAR MALADY.—A young man named Oreno Deeds, residing about two miles south of this place, came into town yesterday, and called upon Dr. Z. M. Landadown, stating that he had experienced a viclent roaring or noise in his head, accompanied by acute pain. The seat of the difficulty complained of seemed to be in his right ear. He stated that he had first been attacked with the malady on the preceding night, and that it had rapidly increased until, when he visited the Doctor, it was simest unbearable. Dr. L. proceeded it was almost unbearable. Dr. L. proceeded at once to dilate the ear, and make an examat one to draw the east, and make an examination into the cause, when he discovered a number of small white worms, about an eighth of an inch in hength, (contoal shaped) passing to and fre in the orifice with great repidity. He inserted an instrument into the planty. He inserted an instrument into the car, and, after a somewhat procracted effort, succeeded in taking out ninety-two of these worms, which gave entire relief, and the young man went home entirely relieved, or, at least temporarily relieved of the painful and unpleasant noise complained of. Dr. Landadown informs us that this is the first case of the kind that he has ever had in his case of the kind that he has ever had in his

The Secretary of the Interior, on the reception of this communication, immediately telegraphed to the Deputy Marshal, informing him that a Revenue Cutter had been ordered from Charleston to cruise along the coast of Florida. Under his directions, the Deputy accordingly went on board the Cutter on the 30th of June, and reached New Smyrna on the 3d of July. Two weeks thereafter he wrote that he had hoarded various schooners to which suspicion might point, searched carefully, enquired for any signs of vessels along the coast, and came to the conclusion that there was no information to justify the reports of the landing of Africans.

MESSES. J. BURNETT & Do.—I cannot refuse to state the salutary effect in my own segravated case, of your excellent flat Oil—(Coronine.)

For many months my hair has been initing off, until I was fearful of loxing itentirely. The skin twom my head became gradually more and more inflamed, so that I could not touch it without pain. This irritated condition I attributed to the use of various advertised hair washes, which I have since been told contain camphene spirit.

By the advice of my physician, to whom you had shown your process of purifying the Oil, I commenced its use the last week in June. The first application minyed the itching and irritation; in three or four days the refuses and tenderness disappeared the heir ceased to fall, and I have now a thick growth of new heir I trust that others, similarly afflicted, with be induced to try the same remedy. wiit be induced to try the same remedy. ON THE WATER. On the water, on the water,
While the Sunner days were fair,
Whisperfing words in softest accente
Through a veil of drooping hair;
While the little car was perping,
Hall-arhamed and rosy red,
Blushing at the carnest meaning
Of the tender words I said—

On the water, on the water, Fairly shone the santes mathen, Dancing on the diny tipples, Lighting up the far-off glen; None could them us say the fris Swaying in her golden pride. And the littles ever moving With the motion of the tide.

On the water, on the water,
While the twilight shades drew high,
Catching at the drupping branches
As we floated high by;
Oil: her small hand's gentle pressure,
And her shade as words above,
And her soit cheek's bright carnation,
When I told her all my love!

On the water, or, the water, Now I float, but all alone, And I mais the silten ringlets, And the little hand is gone; birs the sunset's critation beauty, Comes the twilight as of yors, All rounid me of the dear one. Lust to me for evermore.

had only this one, for a last round. The eddies crossed and rushed in the breadth of the noble St. Lawrence, varying the current from the still to the ruging. Amidst all these, the resistless paddle, sometimes turned aside, but not thrown back, placed us alongside of number Eleven. Now, to realize what these piers are, one must remember that the very preparation and beginning are equal to a 'permanency' in most works. Sheridan declared in view of a threatened mutiny in the army, that it was an awful thing when the extinguisher took fire. So, in going at this affair, one has to anchor out the anchorage! very securely. The St. Lawrence gave the engineers full notice that it claimed a right of way, a most ancient right, never before disputed. The cribs which are first with lungs weight of stone put down, as securities for the greater cribs, are respectable in their own department. They will fight the current where the boldest fluke would be torn from the anchors. To this, the oval frame-work is secured, and this filled, so as to be waterlight, is pumped out, and in this great well, the masonry is laid. The bottom found, the busy lingers of the steam-engine more with the masonry is laid. The bottom found, the busy lingers of the steam-engine more with the mason's skill, and amidst the fierce waters, the great pillar goes up, to endure the bottle with the ice of a climate that brings the mercury to the buth, its winter light its only real work, the burden of a thousand trains unheeded by the gigantic granite. The stone-work in its laying is in the comparison easy, it is the preparation in which is the vast difficulty of the undertaking.

These foundation stones must be laid on a smooth surface. The pier cannot tread upon a rouling stone, and to effect this even surface

MAGNETICPLASTER THIS ENORMOUS QUANTITY OF this Invaluable Remedy has been purchased by clizeus of the United States during the short time it has been before the public. The reason for this

it has been before the public. The reason for this actraordinary success is simply in the actual truth and value of the article. No one buys the MAGNEF. IC PLASTER without becoming its friend. It performs all that is promised, and carries with it its own recommendation. Firstly this is a Victory—peace, ful and bloodlers—but we believe not less glorious than the triumphs of war, with its train of carning and desolution.

int and bloodless—but we believe not less glorious than the triumphs of war, with its train of carnage and desolation.

The MAGNETIC PLASTER is undoubtedly the Greatest Strengthener and Pain Destroyer that Science has yet discovered. If you put this Plaster anywhere, if Pain is there, the Plasterwii stick there until the Pain has vanished. The Plaster magnetises the Pain wave, and Pain Cannot Exist Where This Plaster is Medically and Pain Cannot Exist Where This Plaster is Medically and Pain Cannot Exist Where This Plaster is Medically it, Nervousness, Neuralgia, Dyspersia, Coughs and Golds, Pains and Aches of every kind, are IMMERITALLY RELIEVED, and, with a little patience, PERMANNELY CURIED, by the magical influence of the MAGNETIC PLASTER. It is the simplest, surest, satest, pleasantest and cheapest remedy in existence, its application is universal—equally to the errorg man, the delieste woman, and the feeble infant. Its use is agreenable, and without annoyance or troule. Its price is within reach or alt—rich or poor; all may have it, and all should have it who are sick, and suffering in any way.

FARMERS and PLANTERS should always be supplied with the MAGNETIC PLASTER. It will be the Good Physican in any household, ready at all times and at instent notice.

Put up in sir-tight tin boxes. Each box will make dix to eight plasters, and any child can appread them. Price, twenty-five cents per box, with full and plain directions.

PIEE WHEAT.—The objections which millers have made to fife wheat, it seems, are not insuranountable. They say that it is meessary, it account of its hardness, to grind it there than other wheat, and that in consequence of the britteness of the outer covering of the kernels it has been next to impossible to keep the bran from specking the flour. The Green Lake Democrat says, this objection can be obviated by passing the grain through a volume of steam, which has the effect to damper, and toughen the grain. Wheat which has been subjected to this process makes just as good brend, is as free from specks, and is as white, as any extra flour made from selected wheat.—Janescillo Gasette.
